# BORG & BECK

With over 100 years history of engineering excellence and OE pedigree, Borg & Beck has established itself as a world-renowned brand offering premium quality components to the vehicle aftermarket.

Starting life back in 1903 and being the first to patent the sliding clutch, Borg & Beck has been a trusted brand by some of the world's largest vehicle manufacturers, and during a certain period in its history was fitted to almost every single British made vehicle.

Since 2006, when the Borg & Beck brand was acquired by First Line Ltd, the global revival of the brand's heritage has been stimulated by investment in New Product development and the introduction of multiple product lines to provide a profitable and desirable proposition for its distributors.
