Clutch Components

WHERE NEXT?

- Introduction
- **Product Range**
- Online Cataloguing
- Quality Control & Specification
- Contact

Borg & Beck is historically known for its engineering excellence and OE pedigree in Clutch. Today, the brand's integrity continues to be upheld by offering a leading aftermarket range of premium quality Clutch components.

The range includes 2 in 1 Clutch Kits, 3 in 1 Clutch Kits, 3 in 1 Concentric Slave Cylinder Kits and Solid Flywheel Kits. In addition to these quality kit packages Borg & Beck offers a substantial range of Clutch Hydraulic products.

The Clutch components are manufactured to exacting engineering standards. Borg & Beck aims to give customers as much technical support as they need and have invested a significant sum to build an industry leading technical facility in the UK to be able to thoroughly test and ensure the quality of each Borg & Beck Clutch. In addition, the test facility gives the Borg & Beck product team the ability to design and produce solutions to resolve problems that may occur with particular OE market-specific applications.

- Original Equipment pedigree
- Full range of 100% new product
- Technical test facility for quality control and product development
- Field service technical support and helpline
- Dedicated online warranty portal
- 2 year / unlimited mileage warranty against manufacturing defects

2 in 1 Kits: 485+
3 in 1 Kits: 1085+
3 in 1 CSC Kits: 520+
Solid Flywheel Kits: 55+
Concentric Slave Cylinders: 100+
External Slave Cylinders: 75+
Clutch Master Cylinders: 55+

Steering & Suspension

Borg & Beck offers a premium quality range of Steering and Suspension components that are designed and manufactured to the highest standards. By using Borg & Beck you are guaranteed a quality product sourced from ISO accredited production facilities, coupled with a total commitment to optimum performance and safety, providing a comparable alternative to OE and other top tier suppliers.

The extensive range of over 8,000 references includes Suspension Arms, Tie Rod Ends, Axial Joints, Stabiliser Links (including Heavy Duty), Top Strut Mounts and Strut Protection, King Pins, Engine Mountings and a wide variety of Bushes.

All Ball Joints, Link Bars and Suspension Arms in the Borg & Beck range, where applicable, come with the necessary fitting components as standard to ensure a hassle free installation.

Borg & Beck is committed to match OE quality. Therefore, when vehicle manufacturers use new technologies such as Hydraulic Bushes and Hybrid Link Bars, the Borg & Beck reference will follow the same OE specification.

- Offering one of the largest ranges of Steering & Suspension in the aftermarket
- All inclusive - Where applicable all the necessary fitting components supplied for ease of installation
- All components are fully tested & quality checked during production for premium quality assurance
- Layout positioning images in catalogue for ease of identification and accurate look up
- Guaranteed to match the OE technology e.g. Hybrid Link Bars and Hydraulic Bushes
- A range of Heavy Duty Link Bars available where a higher specification is required
- A comprehensive 2 year / 24,000 mile warranty for total peace of mind

Suspension Arms: 1,625+

Borg & Beck offers a premium range of 'wet' and 'dry' Braking components, which contains over 6,800 references to provide comprehensive coverage of the global vehicle parc.

Borg & Beck is committed to safety and performance and works closely with its manufacturing partners to ensure the highest quality standards are met at all times. All products are tested to guarantee high standards are maintained even during hostile operating environments.

The Braking programme contains 'BECKTEC' Coated Discs and double rubber 'BECKTEC' Shimmed Pads as standard.*

A range of pre-assembled Brake Shoe Kits are also available from Borg & Beck. These Kits consist of 2 Pre-assembled Brake Shoes, 2 Wheel Cylinders, a hold down kit (Springs and Pins) and a sachet of grease. By using these pre-assembled kits the garage can save upto 45 minutes fitting time, therefore reducing the labour costs.

Brake Discs: 1,600+
Brake Pads: 1,250+
Brake Drums: 320+
Brake Shoes: 500+
Pre-assembled Brake Shoe Kits: 95+
Wear Lead Sets: 140+
Pad / Shoe Fitting Kits: 580+
Brake Hoses: 1,760+
Wheel Cylinders: 450+
Brake Master Cylinders: 150+

*Borg & Beck BECKTEC coated Brake Discs and BECKTEC shimmed Brake Pads are being phased in to replace the existing range from 2015. You can identify a BECKTEC coated Disc by the logo on the packaging.

- All Braking components are fully tested and quality checked during production for premium quality assurance
- Regulation 90 Approved Pads & Shoes
- 'BECKTEC' Coated Discs and 'BECKTEC' double Shimmed Pads as standard
- A comprehensive 2 year / 24,000 mile warranty for total peace of mind

Cooling

WHERE NEXT?

- Introduction

- Online Cataloguing
- Quality Control & Specification
- Contact

Borg & Beck offers an extensive range of over 1,600 premium quality Cooling products consisting of Water Pumps, Thermostats, Thermostat Kits, Switches & Sensors, Coolant Flanges and Radiator Caps.

In the quest to reduce engine emissions, there is a growing trend among vehicle manufacturers to use electric Water Pumps instead of, or alongside, their traditional belt driven counterparts. As a major player in the cooling sector, Borg & Beck has therefore reflected these market developments with the addition of Electric Water Pumps (Primary and Auxiliary) into the comprehensive Cooling programme.

Borg & Beck has an extensive range of Thermostats covering all ages of the vehicle parc from straight forward pressed Thermostats to the technically advanced computer controlled variable Thermostats. Some are supplied as 'bare' Thermostats and others are supplied in housings to be a direct replacement for OE.

- All components are fully tested & quality checked during production for premium quality assurance
- Water Pumps are supplied with 'O' ring or gaskets where applicable
- 360° images within catalogue to aid in the identification process and accurate look up
- Fitting instructions supplied with all water pumps
- Thermostats supplied with and without housings
- Electronic Water Pumps & Thermostats in range
- Comprehensive 2 year / 24,000 mile warranty for total peace of mind

Water Pumps: 780+ (including over 30 Electronic Pumps)

Thermostats: 150+

Thermostat Kits: 370+

Switches / Sensors: 130+

Radiator Caps: 80+

Coolant Flanges: 100+

Wheel Bearing Kits

WHERE NEXT?

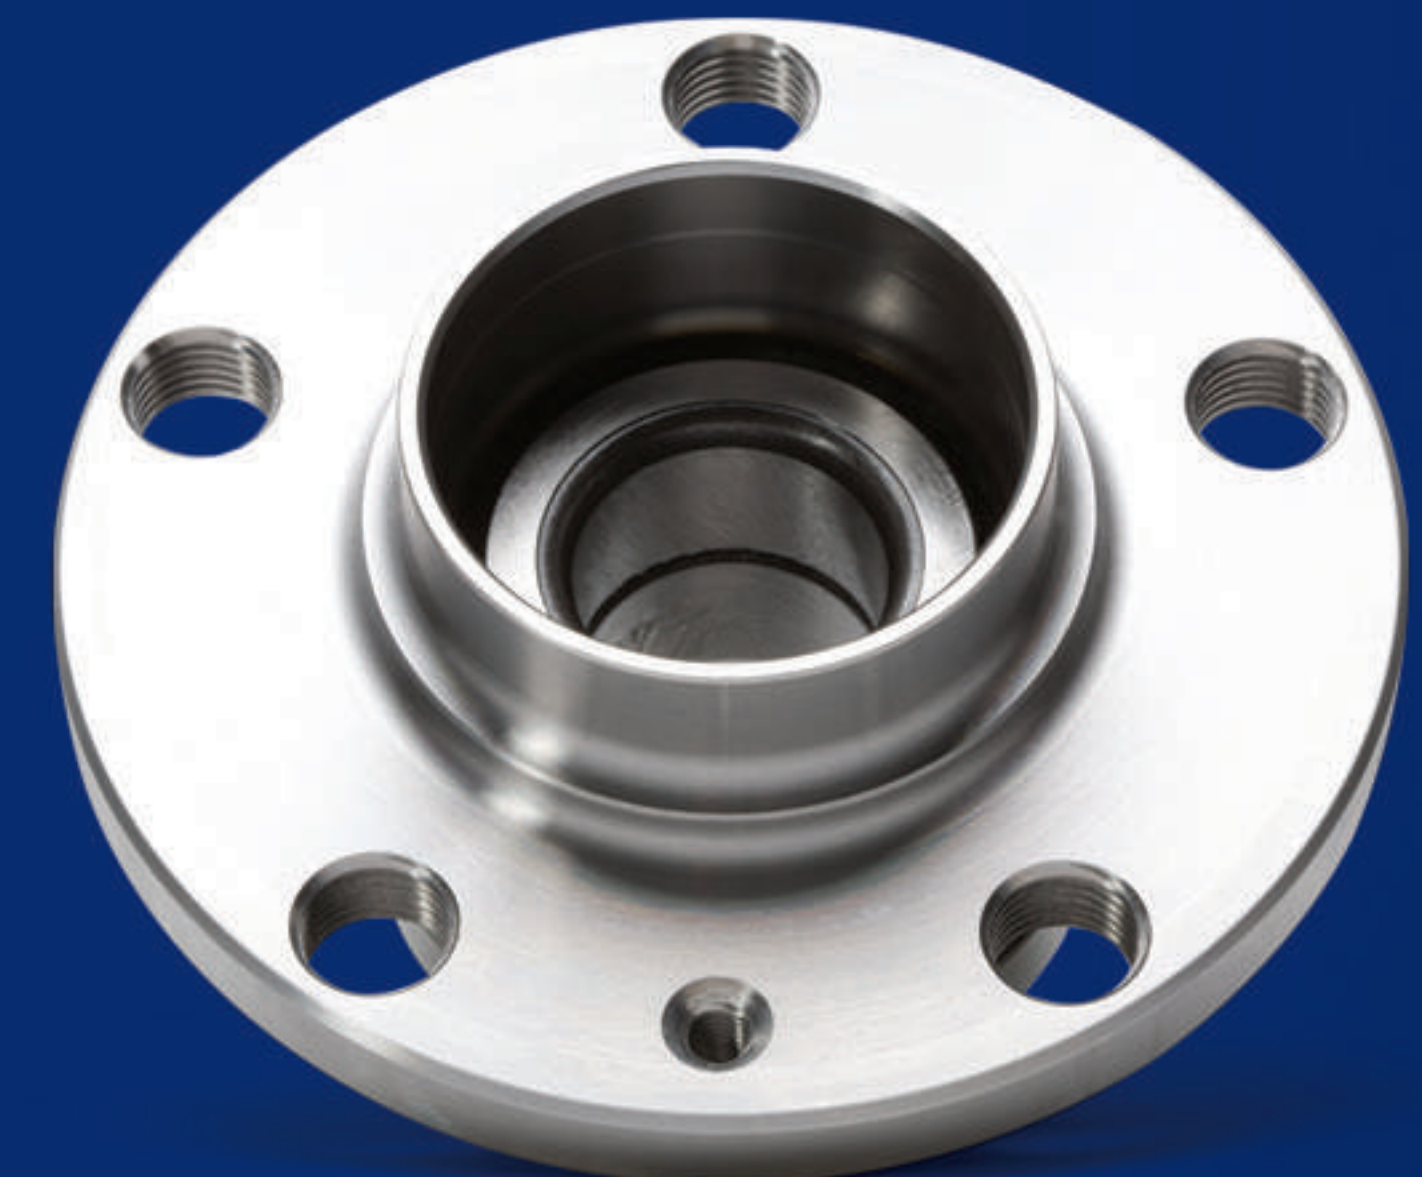

- Introduction

Borg & Beck offers a market leading range of Wheel Bearing Kits consisting of over 1,000 references and a commitment to keeping the range up to date. With not only new model applications but also new technologies, such as the latest generation of Bearings, you can be sure that Borg & Beck is the right choice for you.

More importantly, Borg & Beck provides complete kit solutions rather than single bearings, meaning, as standard, kits include additional components which may not be included in the Original Equipment or competitor equivalent. Our comprehensive catalogue contains technical data, cross references, images of kit contents and now, pictorial identifiers for vehicle models; all of which enables ease of identification and installation.

- All components are fully tested & quality checked during production for premium quality assurance
- Premium Quality OE Bearings supplied
- Pre-lubricated and with additional grease sachet where applicable
- The inclusion of all the necessary components as standard
- Comprehensive and up to date range including Active Sensor Bearings and hub assembly kits
- A comprehensive 2 year / 24,000 mile warranty for total peace of mind

Borg & Beck offers a comprehensive range of premium quality CV Boot Kits which are designed to be a direct replacement for the original parts. All kits include the necessary securing ties, CV joint grease and where necessary, additional components required for fitment.

A range of Universal Stretch Boots is also available from Borg & Beck. This short range reduces stock holding whilst covering the majority of the vehicle parc, plus also have the added benefit of easier installation and reduced fitting times for the installer. The Universal Boot range is designed to be used in conjunction with the fitting tools, which are also available from Borg & Beck.

Vehicle-specific and universal Steering Rack Gaiters are also included within the portfolio.

- All components are fully tested & quality checked during production for premium quality assurance
- Full kits include all components necessary for complete replacement
- Manufactured using only premium quality materials for increased longevity
- A market leading range including direct replacement and universal boots
- Rubber alternatives to popular Thermoplastic Boots also available
- A comprehensive 2 year / 24,000 mile warranty for total peace of mind

CV Boots: 840+
Gaiters: 350+

Cables

Driveline Components

WHERE NEXT?

- Introduction
- **Product Range**
- Online Cataloguing
- Quality Control & Specification
- Contact

Borg & Beck offers a comprehensive range of Driveline components featuring Propshaft Couplings and Centre Support Bearings. The range provides a cost effective repair option for light commercial, rear-wheel and four-wheel drive vehicles.

Drive Couplings absorb vibration from the propshaft, which not only reduces noise, vibration and harshness in the passenger compartment, but also protects the other Driveline components.

Propshaft Centre Bearings support the propshaft ensuring correct alignment within the drivetrain is maintained. A worn bearing can lead to vibration, damage to other components and can potentially cause premature failure to the propshaft.

The Borg & Beck range is manufactured using only premium quality bearings and rubber which have been carefully sourced from ISO accredited manufacturers.

- All components are fully tested & quality checked during production for premium quality assurance
- Covers all popular LCV / RWD / 4WD vehicles
- OE bearings fitted as standard
- A comprehensive 2 year / 24,000 mile warranty for total peace of mind

Drive Couplings: 30+
Centre Bearings: 25+

Vauxhall/Opel Gear Linkages

Fits: Vauxhall/Opel Adam, Astra G/H, Corsa C/D, Combo C, Meriva, Tigra, Zafira

Tens of thousands of vehicles are fitted with these parts and the original is renowned for premature failure due to the plastic shift rod becoming loose as it wears, which then pops out of the ball joints, or due to wear of the nylon bushes in the link joints, which consequently causes them to fail. Borg & Beck offers complete linkage assembly kits which are ready to fit. All kits are manufactured using the correct 4.8 grade bolts, upgraded plastics and are zinc coated for longevity providing a premium repair solution.

BKC3001
BKC3002

Oil Sumps & Plugs

With the prevalence of pot-holes and speed bumps now common on our roads, Oil Sumps are becoming increasingly demanded due not only to impact damage, but also corrosion, especially where the protective finish has been damaged leaving bare steel exposed to the elements.

Borg & Beck offers a range of 10 Oil Sumps and 7 Sump Plugs that cater for the most demanded applications.

Windscreen Wiper Motors

Fits: Vauxhall/Opel Astra, Corsa, Zafira

As fitted to several million vehicles commonly found throughout Europe, these parts have been identified as prone to premature failures. Supplied as a direct replacement for the OE part, complete with replacement nuts & bolts and are covered by Borg & Beck's comprehensive 2 year / 24,000 mile warranty.

Wiper Blades

Fits: Various applications

Offering a comprehensive range of premium quality Wiper Blades including Conventional, Spoiler, Hybrid, Flat and Rear Blades, the full range of over 60 references are supplied with a complete selection of adaptors and provides comprehensive coverage for the entire vehicle parc. All Borg & Beck Wiper Blades are made using high grade long lasting natural rubber for a clean and silent operation.

Online Cataloguing

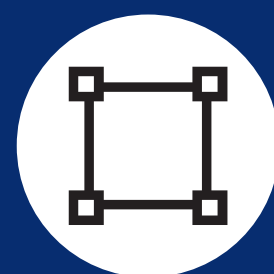

Crucial to any parts supplier is the accuracy of the cataloguing. Borg & Beck are 100% committed to ensuring that the cataloguing of all products is leading in terms of accuracy. It doesn't matter how great the products are if you can't accurately link them to an application and this is why First Line invests heavily in ensuring that the research and data mapping is carried out to a consistently high standard.

A team of data people work daily to ensure that the vehicle data is maintained, and that all the necessary information required to accurately identify the product is easily viewable, so that distributors can confidently supply Borg & Beck products, minimising the need for sending out multiple parts. To further aid the efficient identification of many product groups First Line has added technical layout drawings and 360° imagery, which has been shown to reduce the look-up time significantly.

All products can be identified clearly in Borg & Beck's leading web catalogue, plus Borg & Beck is a certified supplier to MAM AutoCat and TecDoc.

Quality Control & Specification

The company takes important steps to ensure that the products supplied are of the highest quality, a quality that is representative of the brands' positions in the market. First Line Ltd understands every aspect of the products supplied and always provides customers with as much technical information and support as they need.

A significant investment has been made to build an on-site technical facility that enables the specification, testing, comparison and inspection of Clutch products, including CSC.

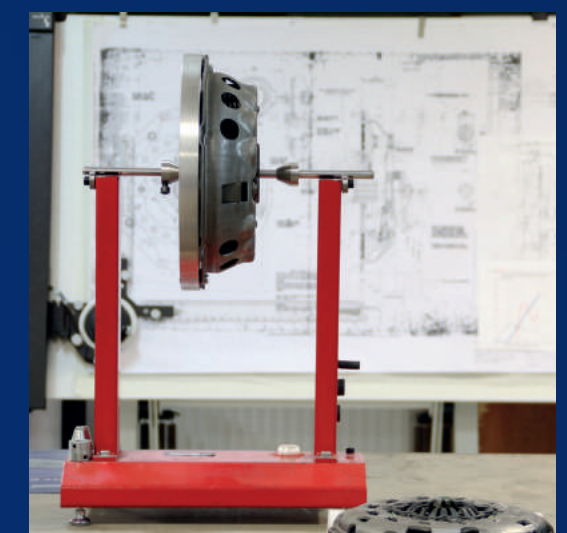

Before a product is introduced and catalogued, whether it's Clutch or any other reference, it goes through extensive quality control processes to approve the quality of product and application. All products are fully tested and certified at production by ISO accredited manufacturers, then new product samples are evaluated against OE and technical specification drawings before being added into the catalogue and released into the market. Once introduced the quality control continues as all new product deliveries are 100% cross checked until fully approved and switched over to random inspection. All products are batch coded for traceability to ensure that distributors can have total peace of mind when associating themselves with our brands that what's in the box won't let them or their customers down.
