

# WINDOW TINTING FILMS

**RHINO**  
TOUGH-STRONG-PROTECTED

## RHINO EXTREME

Rhino Extreme represents the highest level of automotive window film manufacturing. It is a premium window film with superior heat and UV protection, produced using one of the most durable tinting technologies, so it does not show the slightest sign of fading even in 10 years.

**Warranty:**  
12-year warranty on installation\*

### CHARACTERISTICS

- 99.9% UV filtering
- Super shrink and antistatic
- In case of glass breakage, keeps fragments together

## RHINO CERAMIC

Thanks to its ceramic technology, Rhino Ceramic has outstanding heat protection, virtually eliminating radiated heat behind windows. Even in the light version, it has an awesome performance.

**Warranty:**  
10-year warranty on installation\*

### CHARACTERISTICS

- Up to 96% insight protection
- 5% - 90% between seven light transmissions, from darkest to completely invisible
- 99% UV protection

## RHINO HP

A classic dyed-metallized series, having much better heat rejection than dyed films, suggested in case an economic solution is needed.

**Warranty:**  
5-year warranty on installation\*

### CHARACTERISTICS

- Between 5 and 50% with five increments of light protection, from dark to slightly dark
- 99% UV protection
- Up to 61% heat protection

Size: 1524 mm x 30m
